LUMSDEN'S FLEXX FLOW BELTS Reduce further processing Costs in Poultry Plants

During the past spring and summer, Lumsden belts were compared to other manufacturer's belts to see how the Flexx Flow belts performed in further processing plants.

The results were decisive, if not impressive. As it turned out in all cases, Lumsden Flexx Flow's unique hinge provided at design least as long a life, and in most cases, 30 to 100 percent longer life in identical applications. With Flexx Flow's smallest reverse bend in the industry, belts were able to resist the bending and breaking of the "z" bend. With less broken wires this translated into longer life of the conveyor. The longer life also means less time spent repairing and replacing the belting. Belt costs and maintenance costs went down.

An even larger benefit was that it was deter-

mined that most conveyors could be modified slightly, gaining even additional belt life.

This service is available to other plants as a no cost/no obligation service, provided by the BS&k Company. These companies found that a slightly lower initial cost of the belt, reduced maintenance time and costs, and improved "uptime" paid huge dividends for their company.

Lumsden offers standard belts for the further processing industry, sprockets, idlers, rollers and any special product that may be required to operate your plant. Give us a call to discuss any belt problems that you may be experiencing. Just because "it's always been that way", doesn't mean we can't work together to streamline your process, reduce your downtime, improve productivity and eliminate a headache or two.

Inside this issue:

Gremar Metal Industries	2
Sunnex Mounts	2
Sunnex Lamps	2
Wiremation Sprockets	3
BS&k Can work for you	3
Material handling	3
Lubricants & Additives	4

Special points of interest:

- Productivity increases with Lumsden's Flexx Flow Belts
- Gremar offers total solutions to your conveying problems
- Wiremation Introduces standard sprocket driven mesh belts
- Sunnex goes on-line with mount designer
- Lubri-Lab grease & additives extend PM intervals

GREMAR METAL INDUSTRY SETS THE

STANDARD IN MOTION

Process Conveyors Filtering Systems Stairways & Platforms Ermanco Line Shaft Conveyors Blenders & Grinders Panel Boxes

For nearly a quarter century Gremar has been the industry hallmark of quality and service when it comes to process equipment, material handling systems and specialty fabrications for the food, dairy and paper industries.

From our headquarters in Green Bay, Wisconsin, we offer clients a full range of services from engineering to installation. When it comes to putting time back in your schedule, we understand that your business depends on making and selling your products, not just buying our equipment. That's why, for many fortune 500 companies to small family run businesses, customers have come to rely on our total solution business approach.

At Gremar we're dedicated to

creating breakthrough solutions to make your business more successful. Our products are more than just equipment. They represent a new way of thinking.

From concept development to project follow-up, from raw product to shipping, Gremar has the people, experience, products and knowledge to make your next project a success.

SUNNEX INTRODUCES ON-LINE MACHINE MOUNT SELECTOR

Create a Quote

SUNNEX Online Machine Mount Designer

Use our design wizard and submit a quote! Our sales staff will contact you within 48 hrs. to process your quotation.

For over 25 years, Sunnex, Inc. ket has been manufacturing prod- sor ucts for a wide variety of appli- nar

cations in the industrial, assembly, medical and consumer markets. Our customers include some of the most recognized names in business today.

Sunnex offers products that pro-

vide direct leveling and insulate machinery against the adverse effects of vibration and structure-borne noise. The product spectrum represents the ideal solution for all types of applications.

SUNNEX LAMPS HELP MAINTENANCE SEE

The Sunnex halogen task lamps, and in particular the HS700 series have been used by maintenance personnel to see into areas where they could not see before.

By permanently mounting these moisture resistant lamps in areas where light is needed to make critical adjustments, personnel can now see exactly what needs to be repaired or adjusted.

The job can be accomplished quickly and correctly, returning the equipment to productivity faster and properly.

Ask how we can fit these or other lamps into your application.

WIREMATION "GIVES TEETH" TO SPROCKET Driven Mesh Belts

Wiremation introduces a line of sprocket driven mesh belts. By incorporating a Balanced Weave Belt with a corresponding sprocket, positive tracking can be achieved.

This belt is used in the food industry where a tight transfer or exact timing is needed. The sprocket eliminates belt slippage when the product or process creates slippery conditions. The teeth of the sprocket meshes into the openings of the belt to create a positive drive. Much less expensive than heavy chain edge belts.

Don't be fooled by others that tell you it can't be done or they are the only company that can make this happen. Wiremation has been doing this for years and has many satisfied customers.

Now, we offer a standard product line of meshes and sprockets. Let us show you what we can do!

BS&k COMPANY INTEGRATES LOCAL SERVICE WITH NATIONAL KNOWLEDGE

The BS&k company has been providing local service to companies for 4 years.

Knowledge that we have gained from national companies has allowed us to service companies locally, the way most national companies get serviced. Let us work with you and provide the following:

- Plant Surveys
- Complimentary Product lines
- Competitive Pricing
- On-site troubleshooting
- Installation Assistance
- Order History Analysis
- Stocking Plans

Contact us today and let us show you what we can do for you. No cost / no obligation!

SANITATION & MATERIAL HANDLING

LUBRI-LAB GREASE AND ADDITIVES REDUCE BREAKDOWNS AND EXTEND PM INTERVALS

For many years, Lubri-Lab has been offering quality products that exceed the Highest Market Standards while keeping with leading edge technology. Concerned about the environment as well as our customer, Lubri-Lab has formulated many products necessary to resolve specific problems in the Industry.

We offer a complete line of quality greases & additives, which supply exceptional performance under all adverse conditions. (High speed, load, Im pact & water wash out, and heat) In-

cluding Food Grade Products. The B S&K Company is proud to be a distributor of Lubri-Lab in NC. SC and Tennessee. We will be glad to help you make a lubrication trail. We use bearing analy-

sis that will provide you extended bearing and grease life. Helping you to be proactive in your maintenance.

We also offer oil analysis services, as well as lubrication courses, that will help your maintenance department to control costs while improving efficiency.

The BS&k Company values highly the business you place with us and we remain committed to continuing to supply you with quality products and technical support.

Let us know if you would like a sample, a demonstration or more information on this remarkable product line.
