

IN MOTION FOR YOU ...

Winter 2020

Volume 21, Issue 1

ANOTHER DECADE OF SERVICE FROM THE BS&K COMPANY TO OUR CUSTOMERS

As hard as it is to believe, we are entering another decade of servicing our customers, and often their customers, with parts to keep their business running smoothly and efficiently.

We started this business in 1999 and we had only one goal. It was to represent only quality suppliers and match their products to our customer needs. I think we have done pretty good. We also know that it is only because of the truly great customers we have acquired along the way. Have we made mistakes along the way? I'm sure. But I have always said that it is how you handle those mistakes which determines future business.

My wife Sue, although she does not work full time with us, has been invaluable at keeping the business running from behind the scenes. What she learned from traveling with me at the beginning has really helped us. And now, I am proud to announce, for those that did not know, my son John has joined our business. He is calling on companies from Greensboro, NC to Columbia, SC. Don't hesitate to call John for a visit, samples, literature, a quote, technical question or just a second opinion. He has all the tools he needs to help you.

At this time I really want to thank the truly great principals we have for striving to make the best parts available, having the best service while providing on-time deliveries. That makes sales truly enjoyable. Thanks!

But having great principals only works if you have the best customers. Customers that expect the best, question what they don't understand, train their people on the applications of these parts and are willing to discuss any problems that may arise from production so we can work together to improve our products and their application. Thank you all too!

Special points of interest:

- Pobco expands the PET product offering
- Wrabacon has innovative equipment for product handling and automation
- Wiremation Introduces standard sprocket driven mesh belts and extends the Sidewinder line
- REMCO can clean up your sanitation problems while keeping tools separate

LUMSDEN BELTING SIDEWINDER HELPS REDUCE STRETCH AND MESH DAMAGE IN THE TOUGHEST APPLICATIONS—TRY US!

Lumsden introduces the new **Sidewinder Belt Family**. Balance weave belting has been around for over 100 years with minor improvements over time. There are companies that offer round wire and some that offer top flattened wire, but none have been able to conquer the challenge of shaping the **sides** of the wire, until now. Through years of R&D, Lumsden Belting has found the answer to everyone's question... How can I make my belts last longer? The answer is in the shape of the wire. With Lumsdens' patented side shaped wire design, you can extend your belt life up to **8 times** longer than your current comparable belt. And we are willing to prove it to you.

- Side shaped wire increases strength
- Flattened sides reduce carry over
- Greater open area.
- Minimal stretch
- Quick and easy to splice

With Lumsden's patented side flattened wire, the "I-beam" design gives 3 times greater structural support for your product versus the standard round wire.

POBCO PLASTICS LATEST CATALOG HAS MANY NEW ITEMS TO REDUCE YOUR FRICTION AND YOUR COSTS

POBCO Products

- Plastic Guide Rails
- Plastic, Stainless Steel Brackets
- Rollers (Plastic, Steel & Wood)
- Bearings (Plastic & Wood)
- Plastic Sheet Stock
- Plastic & Wood Rod Stock
- FEP Shrink Fit Roll Covers
- Special Rollers
- Teflon Coated Fabric/Tapes/Belts
- Pressure Sensitive Plastic Adhesive Wear Tape

POBCO Capabilities

- Extruding
- Molding
- CNC Machining
- Screw Machining
- Turning
- Milling
- Routing
- Secondary Operations
- Assembly
- Custom Machined & Extruded Profiles & Shapes
- Die Cutting/Punching

POBCO Materials

- ULTRA-D® UHMWPE (Ultra-High Molecular Weight Polyethylene)
- Static Reduced UHMWPE
- UV Stabilized UHMWPE
- High Temperature UHMWPE (Fluid Lubricant-Filled UHMWPE)
- PLUS®
- Steel Filled UHMWPE
- High Wear CP, Black or Green
- Rulons® (Hi-Temp Food Grade 641, Bearing grades LR, J)
- Low & High Density Polyethylene (PE)
- Acetal (Delrin®, Celcon®)
- Delrin AF® (Teflon Filled Acetal)
- Delrin® (Also Lube-Filled & Oil Filled Types) (Solid Lubricant-Filled Delrin) (Fluid Lubricant-Filled High Temperature Plastic) (Lubricant-Filled Grey Nylon) (NylatronGS®)
- DELLUBE
- Nylon
- NYLUBE
- Nylon MD
- PVC (Polyvinyl Chloride) (High Heat Plastics) PTFE® Glass Filled (Urethane: Specify Durometer Reading & Color)
- TEFLON®
- Teflon
- POLYURETHANE
- POLYPROPYLENE
- Flurosint 207® (High Heat)

POBCO® Guides and Accessories Overview

LUMSDEN'S EDGEWISE BELT HAS DRASTICALLY REDUCED BELT WASTE DUE TO TANGLING

Lumsden's **Edgewise** edge has proven to many customers that this design prevents tangling and catching of the wires both on and off the machine. They come off the rolls un-tangled, they don't catch on adjoining belts, and there are no ends to bend open and break.

Less downtime, less scrap and with the buffed edge, less cut hands. A real winner in all cases.

With the **Edgewise** edge, wires do not have to be opened and then closed again to splice belt. This prevents the ends from breaking off, and having to re-splice the belt, like other belts do.

Don't forget your drive components!

We can supply the sprockets, idle rollers, nose rollers as well as the wear strips and belt supports. The nose rollers, in addition to tracking, protect the "Z" bends of the belt. By replacing them before they wear down, you can increase the life of the belt and extend maintenance intervals. Let us show you how we can save you money.

LUMSDEN FLEX TURN BELTS, THE NEXT GENERATION IS HERE .

Lumsden has the new and improved Flex Turn Belt. This belt is made to precise tolerances and without any splice clips that can harbor bacteria.

Lumsden Turn Belt - Look, no tubes!

Edgewise "Snag-free" edges

Our longer belt edge greatly reduces tangling during installation and improves operator safety by making it virtually impossible to snag.

Typical Competition Belt Edge

Lumsden Belt Edge

Our belt is a "drop on" belt that requires no modifications to your existing conveyor. We'll be happy to show you the difference.

WE PROVIDE SOLUTIONS TO YOUR AUTOMATION CHALLENGES

Wrabacon has designed and manufactured automated conveyor systems for products of varied shapes, sizes and weights, with each design tailored to fit into the curves, bends, raising or lowering of existing production lines. These systems can be stand-alone units or integrated to respond and operate with a customer's in-use equipment.

Product input can be singular or multiple, and the automated conveyor systems are programmed to carry the products at speeds compatible with upstream or downstream components. These conveyors reduce or eliminate physical handling of product, which in turns generates a controlled product flow through the system that can be increased or decreased as the demands of the system dictate. We are experts in controlling product orientation, and creating controls that determine product movement. Each System is designed to meet the specific requirements of the customer and product. Various types of conveyors are available based on customer requirements. Mild steel, painted steel and stainless conveyors are available.

Let us design some equipment for you. <http://www.bsandk.com/>

WIREMATION CLEANS UP YOUR OILY PROBLEMS WITH IT'S FILTER BELT

Filter Belts Any plant that is frying is a likely Filter Belt customer. Filter Belts are most commonly used in the Stein SF Series Continuous Force Flow Filter, which is, by far, the most common system used in the industry. These belts are used to filter the oil used in the fryer, extending the life of the frying oil and minimizing the formation of fatty acids. Filter belts can remove particles as small as 80 micron or 60 micron. After the particles are removed from the oil, they are removed from the belt by a scraper for reclamation or recycling.

In addition to the 316 SS Reverse Double Dutch weave mesh material and the low profile alligator lace, contact us to tell you the other features why our filters do a better job, and last longer.

SPIRAL BELTS, INSTALLATION AND SERVICE

Ashworth, the inventors of the low tension spiral systems, are manufacturers of turn curve belts made from metal, hybrid metal and plastic. We can design, inspect, repair, retrofit, rebuild and install a belt for you.

Let the experts work on your spiral. You will see the difference from the beginning through the work and installation. Call today and let us show you how we can help you with the latest designs, applications and products, including our Self Stacking Belt, the ExactaStack™.

REMCO KEEPS YOUR WORKPLACE CLEAN AND SANITARY

Products from **REMCO** can be color-coded to help divide the production cycle into different zones or tasks. By identifying these as different cleaning areas, the movement of contaminants around the production area can be effectively blocked.

Let **BS&k** show you how **REMCO** products can clean up your sanitation problems and let you get back to what you do best, that is, running your business.

BS&k COMPANY INTEGRATES LOCAL SERVICE WITH NATIONAL KNOWLEDGE

The BS&k company has been providing local service to companies for 10 years.

Knowledge we have gained from working with national companies has allowed us to service companies locally, the way most national companies get serviced.

With 30 years experience in sales and manufacturing environments, we know how critical it is to you to have your lines up and running, when you need them up and running. We won't let you down!

Let us work with you and provide the following:

- *Plant Surveys*
- *Complimentary Product lines*
- *Competitive Pricing*
- *On-site troubleshooting*
- *Installation Assistance*
- *Order History Analysis*
- *Stocking Plans*

Contact us today and let us show you what we can do for you.

We have a CD with our literature, catalogs and other information on it. Let us send one to you.

Featured Application

Application: Stainless Steel and Painted Steel Lifting Devices

Principal: SuperLift

SuperLift is A North American Supplier of Industrial Lifting & Handling Equipment including:

- Column lifts, Mezzanine lifts, Ingredient lifts
- Lift Tables, Pallet Lifts and Tilters
- Low Profile and ground level lifts
- Man lifts and inverters
- Pallet Trucks and lift trucks
- Tuggers, pushers and stackers
- ◆ Ergonomic and Custom Lifts
- ◆ They also specialize in the custom manufacture of any lift device you can come up with. All Capacities are from 500 to 200,000 lbs

Product: Stainless Steel Scissor Lifts.

- Capacities from 250 lbs to 20,000 lbs
 - Standard lifts, ground level, lift and tilts, double lifts, low profile, heavy duty all available
 - 304 and 316 stainless steel polished #4 or mirror finishes
 - Stainless steel cylinders or ball screw units for precision applications
 - Lift heights to 120"
- Powered drive also Available.
 - Powered by air, hydraulic or electric ball screw
