Spring 2007

Volume 9, Issue 2

SANITATION AND SAFETY

One of any industry's top priorities is meeting its customers' requirements for quality. This is a challenge that can be met only with an effective, up-to-date quality assurance system -- a system that doesn't simply find errors after they occur, but that can identify potential problem areas and prevent quality lapses before they happen.

The Hazard Analysis Critical Control Point (HACCP) system was developed with this end in mind. To help ensure consistent quality, HACCP provides a thorough analysis of the production cycle and identifies specific areas of biological, chemical or physical risk.

Remco Products offers a wide range of products, including the Vikan hygiene system® to help your customers achieve the highest quality standards. Produced in accordance with ISO-9000 guidelines, this system is designed to be an essential component of an overall HACCP program.

Products from Remco are color-coded to help divide the production cycle into different zones or tasks. By identifying these as different cleaning areas, the movement of contaminants around the production area can be effectively blocked.

Let BS&k show you how REMCO products can clean up your sanitation problems and let you get back to what you do best, that is, running your business.

Inside this issue:

POBCO adds New Products	2
KVP offers new products	2
Wrabacon Innovation	2
Wiremation Sprockets	3
Lumsden Edgewise Belt	3
BS&k works for you	3

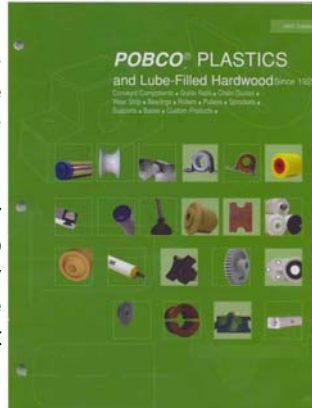

Special points of interest:

- Pobco expands the PET product offering
- KVP has new products to show .
- Wrabacon has innovative equipment for product handling
- Wiremation Introduces standard sprocket driven mesh belts
- REMCO can clean up your sanitation problems.
- Lumsden's "Edgewise" untangles your problems.

POBCO ADDS TO THE MANY COMPONENTS THEY MAKE FOR CONVEYORS AND CONVEYING

Pobco has the new 2007 catalog out. It contains 128 pages of conveyor components such as Lube Filled Chain guides, Slit Flange Bearings, Roller Chain Guides, with #50 K-1 attachments, Low Friction UHMW Neck Guides, Accumulator Conveyor Tubing, one and two piece Spools, Medium Duty Sanitary Mounts, Pillow Blocks, 2 bolt Side Flange, 3 bolt Flanges and 4 bolt Side Flanges, plus a whole lot more.

Call for your FREE 2007 catalog today! (800) 634-1114

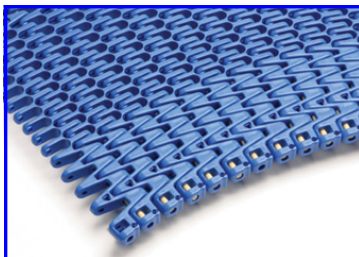

KVP INCREASES IT'S GRIP ON PRODUCTION PROCESSING WITH "TRACTION-PRO" AND OTHER NEW PRODUCTS

Traction Pro: 1" pitch All-In-One belt with a co-molded friction surface rubber top is great for the right amount of needed friction. The proven design of the All-In-One belt is enhanced with this feature where friction and strength is required.

Texture Top: 1/2" pitch belt with the top surface recessed for retention and release for dough handling makes movement and cleaning a reality. This belt, another member of the 1/2" pitch family, fills yet another void in the processing belt offerings

Spiral Pro: 1 1/2" pitch, 1.3 turn radius spiral belt for spiral freezers, coolers and proofers. This is another radius belt that KVP offers to solve your production requirements. Call for a no obligation quote today.

SOLUTIONS THROUGH INNOVATIVE AND CUSTOM EQUIPMENT

Wrabacon designs and manufactures a variety of quality and innovative product handling equipment. From Conveyors to Mergers to Product Diverts to Accumulators to Tray Stackers and De-Stackers to Box Erectors to Feeders and specialty equipment. Wrabacon manufactures to exacting

specifications. They routinely fabricate in stainless steel as well as extruded aluminum and painted steel. Every piece of equipment, every

system is assembled and test run in our facility to assure a trouble free installation. Wrabacon guarantees that every system will perform as specified. Call us today to let us add you to our growing list of satisfied customers.

WIREFIMATION "GIVES TEETH" TO SPROCKET DRIVEN MESH BELTS WITH TRAXX-RITE

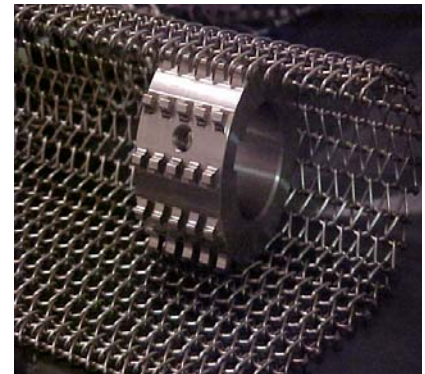

Wiremation introduces a line of sprocket driven mesh belts. By incorporating a Balanced Weave Belt with a corresponding sprocket, positive tracking can be achieved.

This belt is used in the food industry where a tight transfer or exact timing is needed. The sprocket eliminates belt slippage when the product or process creates slippery conditions. The teeth of the sprocket meshes into

the openings of the belt to create a positive drive. Much less expensive than heavy chain edge belts.

Don't be fooled by others that tell you it can't be done or they are the only company that can make this happen. Wiremation has been doing this for years and has many satisfied customers.

Now, we offer a standard product line of meshes and sprockets. Let us show you what we can do!

LUMSDEN'S EDGEWISE BELT HAS DRASTICALLY REDUCED BELT WASTE DUE TO TANGLING

Lumsden's Edgewise edge has proven to many customers that this design prevents tangling and catching of the wires both on and off the machine. They come off the rolls un-tangled, they don't catch on adjoining belts, and there are no ends to bend open and break. Less downtime, less scrap and with the buffed edge, less cut hands.

With the edgewise edge, wires do not have to be opened and then closed again to splice belt. This prevents the ends from breaking off, and having to re-splice the belt. Edgewise edges are available on all belts in the 3/8", 1/2" and 5/8" pitches. The part numbers get a "6" in front of them, but everything else stays the same. For a sample or additional information, please call us at (800) 634-1114.

BS&k COMPANY INTEGRATES LOCAL SERVICE WITH NATIONAL KNOWLEDGE

The BS&k company has been providing local service to companies for 9 years.

Knowledge that we have gained from national companies has allowed us to service companies locally, the way most national companies get serviced. Let us work with you and provide the following:

- Plant Surveys
 - Complimentary Product lines
 - Competitive Pricing
 - On-site troubleshooting
 - Installation Assistance
 - Order History Analysis
 - Stocking Plans
- Contact us today and let us show

you what we can do for you. No cost / no obligation! Ask for our CD with literature and other information on it.
