KVP INTRODUCES SEVERAL NEW BELTS TO SOLVE PROBLEMS

Spiral Pro (PR61200)

- 1-1/5 inch pitch
- 63% open contact surface area
- Turning radius equals 1.3 times the nominal belt width to 12" wide; 1.4x to 20" wide and 1.6 above 20" wide
- Connecting rod diameter = 3/16 inch
- Built to USDA & FDA standards
- Standard belt width increments = 1 inch (25.4) nominal, starting from 12 inches (304.8). Non-standard widths available in 1 inch increments upon request
- Material selection may affect belt width - please consult factory for actual dimensions

. . . and KVP has several other new belts as well as many still on the drawing boards. Let's talk about what your needs are to allow us to solve any problems you may be having.

Inside this issue:

POBCO adds New Products	2
FP Laser Line-up	2
Wrabacon Innovation	2
Wiremation Sprockets	3
BS&k Can work for you	3
Material handling	3

Texture Top (TT60500)

- 1/2 inch pitch
- Built to USDA & FDA standards
- Bi-directional
- Connecting rod diameter = 3/16 inch
- Standard belt width increments = 1 inch (25.4) nominal, starting from 5 inches (127). Non-standard widths available in 1/2 inch increments starting at 3 inches upon request.
- Material selection may affect belt width - please consult factory for actual dimensions

Special points of interest:

- Pobco expands the PET product offering
- FP Lasers eliminate time and material waste
- Wrabacon has innovative equipment for product handling
- Wiremation Introduces standard sprocket driven mesh belts
- Material Handling makes work safe, efficient and easy.

POBCO ADDS TO THE MANY COMPONENTS THEY MAKE FOR CONVEYORS AND CONVEYING

Our Scraper Blades are made from a variety of plastic materials such as **Acetal**, **UHMW** and **Urethane**. The Blades are standard or custom in design and used to scrape excess material off of Rollers, Belting or other surfaces. They come in any desired profile in a variety of widths and lengths. **Acetal** is often used when a rigid food-grade plastic is necessary. For Belts with belt lacing a dual durometer **Urethane** is often used. The flexing action of the softer urethane contact edge allows belt lacing to pass under the scraper without joint stress. Hence damage to the belting surface is prevented or minimized.

POBCO® Combiners are used to solve many single filing mass flow product applications. These conveyed products include PET Glass, Metal Bottles and Containers which are vital to the Beverage, Food, Packaging and Container industry. Our Combiners aid the single filing process by converging rails of overlapping rows of

Round Rollers, Spherical Beads or Polygonal Shaped Decagons (10 sided). The decagons add additional vibration and rotation to the mass flow line which helps to prevent "jams" where the conveyed products are bunched prior to their single line transfer. The Combiners are custom made for your applications for light duty to heavy duty jobs in straight and curved sections. There are many widths and lengths available. [\(Please Send Specs\)](#)

FP LASERS WILL START SAVING YOU TIME AND MONEY THE FIRST DAY

Our MLM laser was specially made to respond to the demands of the metal and wood industries. It is essential in the industrial applications to have a small laser that can be easily fixed to the equipment (saws, presses, shears and edgers) that won't be in the way. Besides being small, our MLM model is made entirely Out of aluminum, which is an advantage because it is shock resistant and it makes the system very solid with the bracket. It is also important to mention that the electronic components inside the laser dissipate the heat, because of the aluminum. The heat is then transmitted towards other surrounding parts. This heat transmission phenomenon allows the electronic components to have a longer lifetime especially since heat is their worst enemy. There are special alloys that dissipate the heat by radiation. Our laser is completely sealed, which is water and dust proof. No particular maintenance is necessary. A protective lens uniform and with the right dimensions covers the front of the casing making it easy to clean to avoid wasting time cleaning hard to reach openings.

SOLUTIONS THROUGH INNOVATIVE AND CUSTOM EQUIPMENT

Wrabacon designs and manufactures a variety of quality and innovative product handling equipment. From Conveyors to Mergers to Product Diverts to Accumulators to Tray Stackers and De-Stackers to Box Erectors to Feeders and specialty equipment. Wrabacon manufactures to exacting

specifications. They routinely fabricate in stainless steel as well as extruded aluminum and painted steel. Every piece of equipment, every

system is assembled and test run in our facility to assure a trouble free installation. Wrabacon guarantees that every system will perform as specified. Call us today to let us add you to our growing list of satisfied customers.

WIRESMATION "GIVES TEETH" TO SPROCKET DRIVEN MESH BELTS WITH TRAXX-RITE

Wiremation introduces a line of sprocket driven mesh belts. By incorporating a Balanced Weave Belt with a corresponding sprocket, positive tracking can be achieved.

This belt is used in the food industry where a tight transfer or exact timing is needed. The sprocket eliminates belt slippage when the product or process creates slippery conditions. The teeth of the sprocket meshes into

the openings of the belt to create a positive drive. Much less expensive than heavy chain edge belts.

Don't be fooled by others that tell you it can't be done or they are the only company that can make this happen. Wiremation has been doing this for years and has many satisfied customers.

Now, we offer a standard product line of meshes and sprockets. Let us show you what we can do!

TR 18-16-16, TR30-24-17,
TR30-31-16, TR42-36-18,
TR48-52-17, TR60-48-18/20
* others coming soon.

BS&k COMPANY INTEGRATES LOCAL SERVICE WITH NATIONAL KNOWLEDGE

The BS&k company has been providing local service to companies for 8 years.

Knowledge that we have gained from national companies has allowed us to service companies locally, the way most national companies get serviced. Let us work with you and provide the following:

- Plant Surveys
- Complimentary Product lines
- Competitive Pricing
- On-site troubleshooting
- Installation Assistance
- Order History Analysis
- Stocking Plans

Contact us today and let us show you what we can do for you. No cost / no obligation!

SANITATION & MATERIAL HANDLING

Remco Products introduces a line of metal detectable shovels, scoops, scrapers and mixing paddles. Produced with a specialized FDA-approved polypropylene resin that is easily detected by standard detection equipment. These tools are a great alternative to stainless steel.

Products from Remco are color-coded to help divide the production cycle into different zones or tasks. By identifying these as different cleaning areas, the movement of contaminants around the production area can be effectively blocked.
